

# Ultra high resolution printer for secure card issuance

# MAGICARD Prima 8

# Secure

The Magicard Prima 8 secures card issuance with a combination of inline and post-printing options. Ultraviolet (UV) images or text, printed inline, can be augmented with overlaminates for added durability and security – including standard and customised holographic options. A logical printer lock is fitted as standard.

# Optional - 600 dpi high resolution printing

The ultra high resolution of 600dpi enables the printing of secure microtext and CJK characters down to a 1.3 point size. Fine-lines and detailed, secure graphical elements can be printed in photo quality, right over the edge of the card.

# **Trusted**

High reliability and a market-leading 3 year warranty help ensure the Magicard Prima 8 is trusted worldwide for high-level secure card issuance projects – including drivers' licenses, secure travel passes and localised issuance of payment cards. It is FIPS 201 compliant and on the GSA Approved Product List.

# Versatile

Ease of integration is facilitated by both USB and Ethernet interfaces, with magnetic stripe and a range of smart card encoding options all supported. An inline laminator can easily be added with connectivity enabled via infrared (IR).

# Standard features

## Optional features

Free MagiCover Plus 3 year limited warranty and support\*

Available in the EU, North America and other selected territories. Elsewhere 1 year minimum limited depot warranty.

# Prima 8 is ideal for:

Enterprise, Government and Payments identity applications.

# Printer highlights
